

Data Management Plan (DMP)

Asset Inventory

Answer all questions

- 1. Title of the data asset:** NLP-based Message Prioritisation for Opportunistic Routing: A Case Study of Nepal Earthquake Emergency Communication
e.g., the project or study name

- | | |
|-------------------------------|--|
| 2. Data owner: | Milena Radenkovic |
| Nominated replacement: | Director of Research (<i>change if other</i>) |
| Data steward(s): | Yihang Cao will obtain the existing datasets, store the data securely, clean and preprocess the text data, develop the NLP classifier, and analyse the results.

Milena Radenkovic will provide academic oversight about data management. |
| Data users: | Yihang Cao and the project supervisor Milena Radenkovic will use the data for conducting and reporting the MSc research project.

<i>Note: The details provided in Section 2 may change and need to be updated over the lifetime of the project. Only UoN staff can be data owners, stewards or users; any non-UoN party involved is a third-party and should be described in Section 7.</i> |

- 3. Who or where will the data be obtained from?**
The data will be obtained from existing crisis related social media datasets, mainly CrisisNLP. These datasets contain crisis related Twitter/social media text collected for research purposes, including the 2015 Nepal Earthquake dataset and humanitarian information classification data. No new data will be collected from human participants. The project will use only publicly available or research released datasets according to their stated terms of use and citation requirements. The dataset is available at <https://crisisnlp.qcri.org/lrec2016/lrec2016.html>. The term of use is available at <https://crisisnlp.qcri.org/terms-of-use.html>. The figure below is the screenshot of the term of use.

[Home](#) [About](#)

Terms of Use

The Crisis Computing team at Qatar Computing Research Institute (QCRI) collects data for research on humanitarian computing. This is publicly-available data collected using publicly-available application programming interfaces (APIs).

IN NO EVENT SHALL QCRI OR QCRI'S AFFILIATES BE LIABLE TO THE REQUESTER OR TO THE USER OF THE DATA SUPPLIED FOR ANY SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, EXEMPLARY, OR CONSEQUENTIAL DAMAGES. THIS DATA IS PROVIDED ON AN "AS IS" BASIS AND YOUR USE OF IT IS AT YOUR SOLE RISK.

To the extent permitted by applicable law, you agree to defend, indemnify and hold harmless QCRI, and its parent QF, officers, directors, employees and agents, from and against any and all claims, damages, obligations, losses, liabilities, costs or debt, and expenses (including but not limited to reasonable attorney's fees) arising from: (i) your use of and access to this data; (ii) your violation of any term of these terms in this Agreement; (iii) your violation of any third party right, including without limitation any copyright, property, or privacy right; or (iv) any claim that your Content caused damage to a third party. This defense and indemnification obligation will survive this Agreement and your use of the data.

By downloading or using any of the material available in this dataset, you automatically acknowledge to the following conditions:

- You will not defame, abuse, harass, stalk, threaten or otherwise violate the legal rights (such as rights of privacy and publicity) of others;
- You will not publish, post, distribute or disseminate any defamatory, infringing, obscene, indecent or unlawful material or information;
- You will use the data only for research on humanitarian computing;
- You will keep the contents of these dataset(s) confidential (you can always share the tweet-ids);
- The dataset(s) will be deleted by you upon our request at any time (you can always keep the tweet-ids);
- The dataset(s) will be deleted by you upon completion of the research (you can always keep the tweet-ids);
- You will cite the corresponding paper in derived publications;

4. 4.1 Where will the data (digital and / or physical) be stored?

The data will be stored securely on the student's University of Nottingham OneDrive account.

4.2 How will physical data (e.g., paper forms) be secured?

No physical data will be collected or stored in this project.

4.3. How will you ensure only authorised users have access to the data?

You must notify the ethics committee immediately if a data breach occurs

Access will be restricted to the student and the project supervisor. The data will be stored in password protected University storage. Any local copies will be stored on a password protected device. The data will not be shared with unauthorised users.

4.4 How will access be revoked?

If access is no longer required, shared folders or files will be removed and any local copies will be deleted. If the user leaves the university, access to university storage will be revoked according to university account management procedures.

5. 5.1 Will the asset include data that identifies or could identify people involved in the research, either on its own (e.g., audio or video) or in combination with other data (e.g., location data)?

☒ Yes ☐ No

The dataset includes tweet IDs and tweet text. Although there is no separate user ID column in the inspected file, many tweet texts contain account handles, URLs, hashtags, and location references. These identifiers are not required for the analysis and will not be reported in the dissertation. The analysis will focus only on message text, humanitarian category labels, predicted categories, and routing priority levels. User handles, URLs, tweet IDs and any other direct identifiers will be removed, ignored, and not reported in the final dissertation.

5.2 Will data that identifies or could identify people be de-identified (anonymised or pseudonymised) before it is used?

☒ Yes ☐ No ☐ N/A

5.3 Will data that identifies or could identify people be destroyed after it has been de-identified?

e.g., will audio recordings be destroyed after they have been transcribed or textual responses had identifying details removed

☒ Yes ☐ No ☐ N/A

If No please explain why not:

Note: It is best practice to de-identify data before use and destroy the original data that identifies or could identify people, if possible and practical to do so

6. 6.1 Will the data include special category data?

Special category data includes health, genetic and biometric data, and data about people's sexual orientation or sex life, racial or ethnic origin, trade union membership, political opinions, religious or philosophical beliefs.

☐ Yes ☒ No

If Yes specify which special categories of data will be collected and used in the research:

6.2 Will large volumes of special category data that identifies or could identify people be collected and used?

If you are unsure as to what constitutes a 'large volume' please contact the ethics committee

a) ☐ Yes ☒ No ☐ N/A

If Yes has a data protection impact assessment (DPIA) been conducted?
Contact the University's Data Protection Officer for DPIA guidance

b) ☐ Yes ☐ No ☒ N/A

If Yes please provide the DPIA reference and submit the DPIA with the ethics application:

7. 7.1 Will data collected during the research be shared with third-party recipients (anyone outside the University, e.g., research partners)?

☐ Yes ☒ No

If Yes please list them:

7.2 Will data that identifies or could identify people be shared with third-party recipients?

i.e., with anyone outside the University

☐ Yes ☒ No

If Yes please list them:

7.3 Will data that identifies or could identify people be shared with and / or processed by an online service that is not provided by the University (non-University software)?

This includes GitHub and other repositories that store data that may identify people (storage is part of data processing)

☐ Yes ☒ No

If Yes name and insert a URL to the online service(s) the data will be shared with:

If using GitHub or other repositories, insert a URL to the project site when this has been created

7.4 If data that identifies or could identify people is to be shared with third-party recipients or online services not provided by the University, will the data first be anonymised or pseudonymised?

☐ Yes ☐ No ☒ N/A

If No please explain why not:

7.5 If data that identifies or could identify people will be shared with third-party recipients or online services not provided by the University, do they comply with data protection regulation?

i.e., are they GDPR compliant

☐ Yes ☐ No ☒ N/A

If Yes, please describe how they ensure data protection (e.g., copy/paste relevant extracts from their privacy policy, terms and conditions concerning data usage, or the binding contractual clauses that ensure data protection, include URL's or a University contract number as appropriate):

8. 8.1 Is it a requirement that the data is open and / or made available to others (e.g., following publication)?

See SHERPA/JULIET <http://www.sherpa.ac.uk/juliet/index.php>

☐ Yes ☒ No

8.2 Will data that identifies or could identify people be de-identified before it is made available to others?

i.e., will the data be anonymised or pseudonymised

☐ Yes ☐ No ☒ N/A

If No the data should not be made available to others, unless clearly gathered for public purposes and consent has been obtained

9. Is the data confidential?

e.g., does it involve trade secrets or is will it be protected by a non-disclosure agreement

☐ Yes ☒ No

If Yes please provide the reference number of the confidentiality agreement signed by the University's Research Operations team:

10. Declaration

In signing this form, I confirm that the information provided above is correct.

I confirm that I will not make data that that identifies or could identify people available to others unless it is clearly gathered for public purposes as specified in the ethics forms, and consent has been obtained.

I confirm that I will notify the ethics committee immediately should a data breach occur.

Signed: *Yihang Cao*

Print name: Yihang Cao

Date: 22/06/2026

The DMP should be submitted to CS REC for audit purposes if ethics approval is required for the research. Submit the DMP along with your ethics application.
